

Use Case Diagram

This Use Case Diagram provides a comprehensive overview of the interactions between users and the system, highlighting the essential functionalities of the sticky notes application. Each use case is accompanied by a description, preconditions, postconditions, and triggers, providing clarity on how users can interact with the application.

Sequence Diagram

This sequence diagram illustrates the dynamic flow of interactions between different components of the system when a user creates a new sticky note. It provides a clear understanding of how the system behaves during this specific task.

Class Diagram

These diagrams provide a visual representation of your application's design and functionality, helping stakeholders better understand the system. You can create more detailed diagrams as needed, depending on the complexity of your application.
